
**CLEVELAND COUNTY
HEALTH DEPARTMENT**

The Cleveland County Health Department Animal Control Services, along with the Cleveland County Board of Health and Cleveland County Commissioners would like to acknowledge and thank all individuals and rescue organizations who have played a role in fostering, adopting or rescuing an animal(s) from our local Animal Shelter, helping them to find a forever home.

Since fiscal year 2012-2013, Cleveland County has made concentrated efforts to decrease the number of animals euthanized at the Animal Shelter, and increase the number of animals adopted and/or rescued. Because of your efforts, a total of 1,868 animal lives were saved from the Cleveland County Animal Shelter during the past Fiscal Year 2015-2016, an increase of 162 animals from the previous year.

As a staff, our expectation is to increase these numbers each and every year, but we cannot do it alone. We need your help as a community to fulfill this goal of saving the lives of the many animals that are placed into our care each year for many different reasons.

Again, we thank you for your commitment to making a difference in the lives of so many homeless animals in our community. Please continue to support your local Animal Shelter!

ANIMAL LIVES MATTER TOO!
