

What is **RADON**?

Radon is a cancer-causing, radioactive gas.
You can't see radon, smell it or taste it.
Radon is the second leading cause of cancer
in the United States.

How does **Radon** get into your home?

Radon is a radioactive gas that comes from
the natural decay of uranium that is found in
nearly all soils. It typically moves up through
the ground to the air above and into your
home through cracks and other holes in the
foundation. Your home traps radon inside,
where it can build up.

FREE **RADON** TEST KITS

Cleveland County Health Department Annex

222 Crawford Street Shelby, NC

Distribution begins January 6, 2016

8:00 am—5:00 pm

limited supply available
